

ABOUT US

Modern and Timeless

Pooltableportfolio is a specialized company with a passion for design excellence and innovative products. The organization is committed to offering quality game room tables for residential, institutional/university, commercial interiors.

We address our customer's interior design objectives by supplying them with an in-depth online resource that enables them to determine their own or client's needs. Our products create exciting environments that elevate the senses and challenge the intellect.

Some of our tables are exclusively made for Pooltableportfolio and we are also in the works of manufacturing our own modern design.

Manufacturer's: Pooltableportfolio does not resale just any Billiard Table. The company has to have the highest manufacturing standards because of the class of the clientele and installations they go in. Some of the manufacturer's have been making billiards since the 1800's.

Service: The quality of the product is just as important as the level of quality and attention given to our individualized customer service. Our products are not sold to just make a sale. We pay special attention to customer satisfaction from the initial order to the final delivery. If we are able to and it coincides with our schedule, we try to be at most installations. You, the customer, are extremely important and we want to make sure during the entire delivery and installation process that you are aware of that.

Founding principal Sarah DeFlumeri has a strong commitment to excellence and responsive service that enables Pooltableportfolio to meet the needs of today's most sophisticated clients. Our mission is to go the extra mile for our customers. After relocating from Fidelity Investments in 2001 as a systems analyst for 10 years, Sarah began her design interest in 2003. Having a great appreciation for art and the finer things in life, her venture began with luxury furnishings. Attending several Industry Fairs, she engulfed herself in the world of high end modern design.

In 2007, after having a consultation with a successful Miami Entrepreneur, she decided to focus on one line of products at Pooltableportfolio.com.

Clients: Pooltableportfolio is proud to have tables across the USA in Miami, New York, Texas, Florida, Chicago, and California. Our products are for only those with discerning tastes.

Location: We work out of Massachusetts and South West Florida. A projected showroom is expected to open in the near future in Naples, Florida. Until then, please inquire if you are interested in knowing if there is an installation in the USA that is available for viewing. We have both residential and commercial installations across the USA. The commercial sites are usually available for viewing.
